

# ARTDECO

## CONFIRMATION OF SHELF LIFE TIME

According to the European Cosmetic Regulation 1223/2009 cosmetic products must have an expiry date if the durability of the product is less than 30 months. If the supplier guarantees a durability of more than 30 months, there should be a "Period-after-opening-Symbol" (PAO-Symbol) on the product.

The PAO-Symbol should indicate the consumer how long he can use the product after the opening, without health disclaims. This disclaims are microbiological problems, the contamination of the product with yeasts and germs.

Anhydrous products are very insensitive for microorganisms. For this reason it is not necessary that there is a PAO-Symbol on these products.

We confirm that the cosmetic products with the brand names ARTDECO have durability from more than 30 months.

We hereby confirm that all cosmetics products with the brand name ARTDECO should be shipped and stored between 5-25°C.

We confirm that all cosmetics products should be shipped and stored between 5-25°C.

For some anhydrous products the concept of durability ist not relevant because of their composition and stability. Therefore these products do not have a period of time after opening. For these products the shelf life declared in above table don't apply.
